ODOR-FADE WARNI	NG
A GAS LEAK CAN CA DEATH.	AUSE A FIRE OR EXPLOSION RESULTING IN SERIOUS INJURY OR
	nching chemical added to gas to make it detectable may not warn of a gas le opane or natural gas to all persons in every instance.
Instances where the c	odorant in an odorized gas may be undetectable include:
	ade or be eliminated for a variety of chemical and physical causes, including g pipes, adsorption into or sticking onto the interior of pipes or appliances, or
absorption into liquids	s. underground leaks may de-odorize or remove odorant from the gas.

Version 2.0

Revision Date 2018-04-02

Some people have a diminished ability, or inability to smell the stench. Factors that negatively affect a person's sense of smell include age, gender, medical conditions, and alcohol/tobacco usage.
The stench of odorized gas may not awaken sleeping persons.

• Other odors may mask or hide the stench.

• Exposure to the odor for even a short period of time, may cause nasal fatigue, where a person can no longer smell the stench.

Gas detectors listed by the Underwriters Laboratories (UL) can be used as an extra measure of safety for detecting gas leaks, especially under conditions where the odorant alone may not provide an adequate warning. Gas detectors emit a loud, shrill sound when gas is present and do not depend on sense of smell. Because the odor intensity can fade or people may have problems with their sense of smell, we recommend installing, per manufacturer's instructions, one or more combustible gas detectors, in suitable locations to ensure adequate coverage to detect gas leaks.

Educate yourself, your employees, and your customers with the content of this warning and other important facts associated with the so-called "odor-fade phenomenon."

SECTION 2: Hazards identification

Classification of the substance or mixture

This product has been classified in accordance with the hazard communication standard 29 CFR 1910.1200; the SDS and labels contain all the information as required by the standard.

Classification	: Flammable liquids, Category 2 Skin sensitization, Category 1
Labeling	
Symbol(s)	
Signal Word	: Danger
Hazard Statements	: H225: Highly flammable liquid and vapor. H317: May cause an allergic skin reaction.
Precautionary Statements	 Prevention: P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking. P233 Keep container tightly closed. P240 Ground/bond container and receiving equipment. P241 Use explosion-proof electrical/ ventilating/ lighting/ equipment. P242 Use only non-sparking tools. P243 Take precautionary measures against static discharge. P261 Avoid breathing dust/fume/gas/mist/vapors/spray. P264 Wash skin thoroughly after handling. P272 Contaminated work clothing must not be allowed out of the workplace. P280 Wear protective gloves/ eye protection/ face protection. Response: P303 + P361 + P353 IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/ shower.

entinel® E Gas Odo	rai	SAFETY DATA SHE
rsion 2.0	ıaı	Revision Date 2018-04-
In case of eye contact	:	Immediately flush eye(s) with plenty of water. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.
If swallowed	:	Keep respiratory tract clear. Do NOT induce vomiting. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. Take victim immediately to hospital.
CTION 5: Firefighting measu	res	
Flash point	:	-18 °C (0 °F) estimated
Autoignition temperature	:	200 °C (392 °F)
Suitable extinguishing media	:	Dry chemical. Carbon dioxide (CO2). Alcohol-resistant foam.
Unsuitable extinguishing media	:	High volume water jet.
Specific hazards during fire fighting	:	Do not allow run-off from fire fighting to enter drains or water courses.
Special protective equipment for fire-fighters	:	Wear self-contained breathing apparatus for firefighting if necessary.
Further information	:	Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.
Fire and explosion protection	:	Do not spray on an open flame or any other incandescent material. Use only explosion-proof equipment. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.
Hazardous decomposition products	:	Carbon oxides. Sulfur oxides.
CTION 6: Accidental release	me	asures
Personal precautions	:	Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.
Environmental precautions	:	Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.

	ventilation or other engineering controls are adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure. Wear a NIOSH approved respirator that provides protection when working with this material if exposure to harmful levels of airborne material may occur, such as:. Air-Purifying Respirator for Organic Vapors. Use a positive pressure, air-supplying respirator if there is potential for uncontrolled release, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.
Hand protection	: The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.
Eye protection	: Eye wash bottle with pure water. Tightly fitting safety goggles.
Skin and body protection	: Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. Wear as appropriate:. Flame retardant antistatic protective clothing. Workers should wear antistatic footwear.
Hygiene measures	: When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.
For additional details, see the	ne Exposure Scenario in the Annex portion

Toxicity to algae			
t-Butyl Mercaptan	 EC50: 24 mg/l Exposure time: 72 h Species: Pseudokirchneriella subcapitata (green algae) Method: OECD Test Guideline 201 		
Isopropyl Mercaptan	ErC50: 21.9 mg/l Exposure time: 72 h Species: Pseudokirchneriella subcapitata (green algae) static test Method: OECD Test Guideline 201		
M-Factor propane-2-thiol	: M-Factor (Acute Aquat. Tox.) 1		
	M-Factor (Chron. Aquat. Tox.) 1		
M-Factor propane-1-thiol	M-Factor (Acute Aquat. Tox.) 10		
Elimination information (per	rsistence and degradability)		
Bioaccumulation			
t-Butyl Mercaptan	: Bioconcentration factor (BCF): 12 Bioaccumulation is unlikely.		
Biodegradability	: Expected to be biodegradable		
Number:100000013401	11/16		

Version 2.0

Revision Date 2018-04-02

Ecotoxicology Assessment

Acute aquatic toxicity t-Butyl Mercaptan	: Toxic to aquatic life.
Isopropyl Mercaptan	: Very toxic to aquatic life.
n-Propyl Mercaptan	: Very toxic to aquatic life.
Chronic aquatic toxicity t-Butyl Mercaptan	: Toxic to aquatic life with long lasting effects.
Isopropyl Mercaptan	: Very toxic to aquatic life with long lasting effects.
n-Propyl Mercaptan	: Very toxic to aquatic life with long lasting effects.
Results of PBT assessment t-Butyl Mercaptan	: Non-classified PBT substance, Non-classified vPvB substance
Isopropyl Mercaptan	: Non-classified PBT substance, Non-classified vPvB substance
Additional ecological information	: An environmental hazard cannot be excluded in the event of unprofessional handling or disposal., Very toxic to aquatic life., Toxic to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product	The product should not be allowed to enter drain courses or the soil. Do not contaminate ponds, ditches with chemical or used container. Send to waste management company.	waterways or
Contaminated packaging	Empty remaining contents. Dispose of as unuse Do not re-use empty containers. Do not burn, o torch on, the empty drum.	

For additional details, see the Exposure Scenario in the Annex portion

SECTION 14: Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the
